# ADNAN KHAN

Frontend Developer | Next.js + React.js Specialist | Scalable, SEO-Optimized & High-Performance Web Apps | 5.2+ Years Experience  
Pune, Maharashtra, India

## Summary

I'm a Frontend Developer specializing in Next.js, React.js, and modern UI frameworks (Tailwind, MUI, Bootstrap). With 5.2+ years of experience building products for global brands like HealthKart, MuscleBlaze, Truebasics, and HKVitals, I help companies deliver scalable, SEO-friendly, and high-performance web applications. Optimized product pages and landing pages to achieve top SEO rankings and faster load times. Delivered pixel-perfect, responsive UIs from Figma to production. Scaled apps with SSR (Server-Side Rendering) and AWS deployment pipelines. Built custom solutions like a Canva-style editor with 60% of core features using Konva.js. My focus is not just on writing clean code, but on driving business results — higher retention, faster apps, and better user experience. If you're looking for a developer who can own your frontend, integrate seamlessly with your team, and deliver measurable results, let's connect.

---

## Experience

Alongside

Frontend Developer

April 2025 - Present (10 months)

Braga, Portugal

- Developing Next.js applications and dashboards for high-profile clients such as DoorDash and RELI Safety, enabling efficient back-office management and intuitive client-facing interfaces.
- Building scalable, high-performance dashboards with a strong focus on UI/UX quality and fast load times, ensuring excellent usability.
- Implementing CI/CD pipelines with GitHub Actions, streamlining deployments and reducing release time.
- Leveraging AI-powered workflows (Cursor IDE + AI coding tools) to boost efficiency and code quality.
- Collaborating directly with international teams to deliver business-critical features on time with reliability and precision.

**Monsoonfish Inc. UX & UI Design agency**

**Frontend Developer**

January 2023 - March 2025 (2 years 3 months)

India

- Contributed to web platforms for HealthKart, MuscleBlaze, HKVitals, and TrueBasics, delivering pixel-perfect UIs from Figma designs.
- Implemented SEO optimizations across multiple product/landing pages, resulting in improved search rankings and organic traffic growth.
- Optimized Next.js SSR workflows to enhance performance and Core Web Vitals scores, directly improving conversions.
- Built Barasingha website (70% from scratch) and developed a mock API server in Express.js to speed up backend–frontend integration.
- Followed Agile/Scrum workflows, ensuring on-time delivery across multiple domains simultaneously.

**HealthKart**

**Frontend Developer**

January 2023 - December 2023 (1 year)

Pune, Maharashtra, India

- Engineered scalable, responsive interfaces for HealthKart and sister brands (MuscleBlaze, TrueBasics, HKVitals).
- Drove SEO-focused improvements across PDPs, PLPs, and landing pages, boosting organic visibility.
- Integrated complex APIs to deliver dynamic, data-driven UIs with minimal load times.
- Collaborated with designers and product managers to ship high-quality features under tight deadlines.
- Pioneered early development of the Barasingha e-commerce website, including backend API mock server setup.

**IOT EXCEL**

2 years 2 months

**Software Engineer**

August 2021 - January 2023 (1 year 6 months)

Kondhwa , pune , 411048

- Designed and developed responsive dashboards and campaign management screens, increasing user retention by 200%.
- Built a Canva-style editor (60% feature parity) using Konva.js, handling shapes, text, and media manipulation for custom campaigns.

- Delivered pixel-perfect UIs from Figma, while introducing UX improvements that boosted engagement.
- Leveraged React.js, Tailwind CSS, MUI, Bootstrap to build scalable, maintainable web apps.

**Software Engineering Intern**  
December 2020 - July 2021 (8 months)  
Kondhwa

- Developed modules in Python Django for handling print orders with PyPDF2 and MuPDF.
- Built internal tools including an inventory management system (UScale) and web pages for eWayPrint.
- First exposure to React.js, laying the foundation for frontend expertise.
